SUBJECT INDEX

Additivity rule
Total electron impact ionization cross sections of free molecular radicals: the failure of the additivity rule revisited 43
Argon clusters
Dissociative xenon ion capture by neutral argon clusters 67
Arrhenius activation energies
Collision induced dissociation of the isomeric ions H_2COOH^+ and $HC(OH)_2^+$ 109
Association reactions
The reaction $SF_5^+ + H_2S$ at near thermal energies: competition between association and binary reactions 117
Attachment cross sections
Interaction of free electrons with C_{60}: ionization and attachment reactions 49

Bimolecular reactions
A further investigation of the reaction of $C_2H_2^+$ with H_2 145
Binary reactions
The reaction $SF_5^+ + H_2S$ at near thermal energies: competition between association and binary reactions 117
Binding energies of $KrCO^+$, $KrCO_2^+$, $(CO)_2^+$
Reactions of Kr_2^+ with various neutrals 121

C_{60}
Interaction of free electrons with C_{60}: ionization and attachment reactions 49

Dissociative ion capture
Dissociative xenon ion capture by neutral argon clusters 67
Dissociative recombination
Dissociative recombination of H_3^+ and some other interstellar ions: a controversy resolved 163
FALP studies of the dissociative recombination coefficients for O_2^+ and NO^+ within the electron temperature range 300–2000 K 183
Double focusing mass spectrometer
Absolute partial and total electron impact ionization cross sections for C_2H_6 from threshold up to 950 eV 31
Interaction of free electrons with C_{60}: ionization and attachment reactions 49
Dynamics of gas-phase reactions
Classical path calculations of the vibrational relaxation of O_2^+ in collisions with He at near thermal energies 101

Electron attachment
FALP studies of electron attachment at elevated electron temperatures: the influence of attachment on electron energy distributions 193
Electron energy distributions
FALP studies of electron attachment at elevated electron temperatures: the influence of attachment on electron energy distributions 193
Electron impact
Absolute partial and total electron impact ionization cross sections for C_2H_6 from threshold up to 950 eV 31
Total electron impact ionization cross sections of free molecular radicals: the failure of the additivity rule revisited 43
Electron/ion collisions
The influence of electron/ion collisions on a low-frequency plasma instability 205

Flowing afterglow
FALP studies of the dissociative recombination coefficients for O_2^+ and NO^+ within the electron temperature range 300–2000 K 183
Flowing afterglow–Langmuir probe
Dissociative recombination of H_3^+ and some other interstellar ions: a controversy resolved 163
FALP studies of electron attachment at elevated electron temperatures: the influence of attachment on electron energy distributions 193

H_2S
The reaction $SF_5^+ + H_2S$ at near thermal energies: competition between association and binary reactions 117
Halogens
SIFT studies of the reactions of rare gas atomic ions with Cl_2 and Br_2 155

Interaction potentials
Classical path calculations of the vibrational relaxation of O_2^+ in collisions with He at near thermal energies 101

Interstellar ions
Dissociative recombination of H_3^+ and some other interstellar ions: a controversy resolved 163
Interstellar molecules
The formation of interstellar molecules: the rôle of radiative association 1
Ion beam deflection
Absolute partial and total electron impact ionization cross sections for C_2H_6 from threshold up to 950 eV 31
Ion/electron recombinations
The formation of interstellar molecules: the rôle of radiative association 1
Ion/molecule reactions
A further investigation of the reaction of $C_2H_2^+$ with H_2 145
An ion/molecule-reaction mass spectrometer used for on-line trace gas analysis 79
Collision induced dissociation of the isomeric ions H_2COOH^+ and $HC(OH)_2^+$ 109
Dissociative xenon ion capture by neutral argon clusters 67
SIFDT studies of the reactions of C^+, CH^+ and CH_2^+ with HCl and CO_2, and CH_3^+ with HCl 131
SIFT studies of the reactions of rare gas atomic ions with Cl_2 and Br_2 155
The formation of interstellar molecules: the rôle of radiative association 1
Ion/neutral processes
Classical path calculations of the vibrational relaxation of O_2^+ in collisions with He at near thermal energies 101
Ion/neutral reactions
The formation of interstellar molecules: the rôle of radiative association 1
Ionization cross sections
Absolute partial and total electron impact ionization cross sections for C_2H_6 from threshold up to 950 eV 31
Interaction of free electrons with C_{60}: ionization and attachment reactions 49
Total electron impact ionization cross sections of free molecular radicals: the failure of the additivity rule revisited 43
Ionosphere
FALP studies of the dissociative recombination coefficients for O_2^+ and NO^+ within the electron temperature range 300–2000 K 183
Isomeric ions H_2COOH^+ and $HC(O)_2^+$
Collision induced dissociation of the isomeric ions H_2COOH^+ and $HC(OH)_2^+$ 109
Kinetic emission
The statistics of electron emission from clean metal surfaces induced by slow ions: measurement and recent applications 17

Langmuir probe
FALP studies of the dissociative recombination coefficients for O_2^+ and NO^+ within the electron temperature range 300–2000 K 183

Magic numbers
Dissociative xenon ion capture by neutral argon clusters 67
Mobilities of Kr_2^+ in He
Reactions of Kr_2^+ with various neutrals 121
Molecular dynamics
Dissociative xenon ion capture by neutral argon clusters 67
Molecular radicals
Total electron impact ionization cross sections of free molecular radicals: the failure of the additivity rule revisited 43

On-line trace gas analysis
An ion/molecule-reaction mass spectrometer used for on-line trace gas analysis 79

Particle induced electron emission
The statistics of electron emission from clean metal surfaces induced by slow ions: measurement and recent applications 17
Plasma
FALP studies of electron attachment at elevated electron temperatures: the influence of attachment on electron energy distributions 193
FALP studies of the dissociative recombination coefficients for O_2^+ and NO^+ within the electron temperature range 300–2000 K 183
The influence of electron/ion collisions on a low-frequency plasma instability 205
Potential emission
The statistics of electron emission from clean metal surfaces induced by slow ions: measurement and recent applications 17
Potential relaxation instability
The influence of electron/ion collisions on a low-frequency plasma instability 205
Proton transfer
An ion/molecule-reaction mass spectrometer used for on-line trace gas analysis 79
Pulsed supersonic nozzle
Time-of-flight apparatus for studies of pulsed neutral van-der-Waals-cluster production and of the interaction between electrons and van der Waals clusters at high electron energy resolution 57

Q-machine
The influence of electron/ion collisions on a low-frequency plasma instability 205
Quadrupole mass analyzer
Time-of-flight apparatus for studies of pulsed neutral van-der-Waals-cluster production and of the interaction between electrons and van der Waals clusters at high electron energy resolution 57
Quenching rate coefficients
Relaxation of vibrationally excited ions $O_2^+(v)$ and $NO^+(v)$ in collisions with He 89

Radiative association
The formation of interstellar molecules: the rôle of radiative association 1
Rare gas ions
SIFT studies of the reactions of rare gas atomic ions with Cl_2 and Br_2 155
Rate coefficients
Collision induced dissociation of the isomeric ions H_2COOH^+ and $HC(OH)_2^+$ 109
Reaction rate coefficients
A further investigation of the reaction of $C_2H_2^+$ with H_2 145
SIFDT studies of the reactions of C^+, CH^+ and CH_2^+ with HCl and CO_2, and CH_3^+ with HCl 131
Reactions of Kr_2^+
Reactions of Kr_2^+ with various neutrals 121
Recombination coefficients
Dissociative recombination of H_3^+ and some other interstellar ions: a controversy resolved 163
RRKM theory
Interaction of free electrons with C_{60}: ionization and attachment reactions 49

Selected ion flow drift tube
A further investigation of the reaction of $C_2H_2^+$ with H_2 145
Collision induced dissociation of the isomeric ions H_2COOH^+ and $HC(OH)_2^+$ 109
Relaxation of vibrationally excited ions $O_2^+(v)$ and $NO^+(v)$ in collisions with He 89
The reaction $SF_5^+ + H_2S$ at near thermal energies: competition between association and binary reactions 117
SIFDT studies of the reactions of C^+, CH^+ and CH_2^+ with HCl and CO_2, and CH_3^+ with HCl 131
Selected ion flow tube
SIFDT studies of the reactions of rare gas atomic ions with Cl_2 and Br_2 155
The formation of interstellar molecules: the rôle of radiative association 1
Semiclassical method
Classical path calculations of the vibrational relaxation of O_2^+ in collisions with He at near thermal energies 101
SF^+
The reaction $SF_5^+ + H_2S$ at near thermal energies: competition between association and binary reactions 117
Stationary afterglow
FALP studies of the dissociative recombination coefficients for O_2^+ and NO^+ within the electron temperature range 300–2000 K 183
Surface ionization
The influence of electron/ion collisions on a low-frequency plasma instability 205

Termolecular reactions
A further investigation of the reaction of $C_2H_2^+$ with H_2 145
Thermionic converter
The influence of electron/ion collisions on a low-frequency plasma instability 205
Time of flight
Time-of-flight apparatus for studies of pulsed neutral van-der-Waals-cluster production and of the interaction between electrons and van der Waals clusters at high electron energy resolution 57
Trochoidal electron monochromator
Time-of-flight apparatus for studies of pulsed neutral van-der-Waals-cluster production and of the interaction between electrons and van der Waals clusters at high electron energy resolution 57

Van der Waals clusters
Time-of-flight apparatus for studies of pulsed neutral van-der-Waals-cluster production and of the interaction between electrons and van der Waals clusters at high electron energy resolution 57
Vibrational energy transfer
Classical path calculations of the vibrational relaxation of O_2^+ in collisions with He at near thermal energies 101
Vibrationally excited ions
Relaxation of vibrationally excited ions $O_2^+(v)$ and $NO^+(v)$ in collisions with He 89
